Debugging Disinfo: A Digital Truth Lab

David McCuan, Professor, Dept. of POLS, Sonoma State University

Tuesday, 03 NOV 2026

Where to Get Information to Check Sources

How to check a URL on the Internet for connection to Russian bots and troll farms:

https://informationlaundromat.com/

Play the "Bad News Game:"

https://www.getbadnews.com/en

NewsGuard / NewsGuard "Reality Check," found here;

Comparative approach (largely EU), found here at "Disinfo Update;"

How to "verify" online information:

https://vision.icivics.org/new-collection-of-resources-teaches-students-how-to-verify-online-information/

How to "dig out" information as a consumer of politics and civics for what is online?:

https://www.inquirygroup.org/

Using the S.I.F.T. method to figure out what is accurate online:

https://libguides.rowan.edu/EvaluatingOnlineSources

Take a course (a short course!) on how to assess and evaluate online sources and materials:

https://teach.kqed.org/p/evaluating-sources

How to build trust in elections, in election administration, and ballot processing:

https://electionlab.mit.edu/research/projects/results-that-matter

RAND's "Tools for fighting disinformation online:"

https://www.rand.org/research/projects/truth-decay/fighting-disinformation/search.html

The Disinformation Toolkit:

https://futurefreespeech.org/the-disinformation-toolkit/

The Brennan Center on AI and Disinformation in Campaigns:

https://www.brennancenter.org/our-work/research-reports/how-detect-and-guard-against-deceptive-ai-generated-election-information

Temple University's "Fake News," Misinformation & Disinformation Guide:
